Ask an Expert Home Improvement Questions UK Appliance Repair Hi I am having problem with my Brandt Fridge Freezer. Hi I am having problem with my Brandt Fridge Freezer. I am not sure about the model and make as it came with the house when we bought it in december. It says A class I think. We dont have a manual. I have defrosted the freezer for about 24 hours and its working a bit better but still not freezing adequately. I pulled the freezer out from the wall and noticed that at the at the bottom of the fridge there is a pipe black plastic corrogated and it seems to be emptying into what was once a clear plastic container. Is this the drain pipe. That plastic container is full of liquid that I assume has come from this pipe. The liquid looks like very dirty water and is full of dust etc. The container is not covered. What do I do Should I get the liquid out. Submitted 9 years ago. Verified Hiya, This container sits on top of the compressor. When the machine defrosts, the ice melts and runs into the plastic container. When the compressor runs to cool them machine it gets hot. This evaporates the water. If the container is smelling, use a sponge to remove the water and clean it out as best you can with a mild bleach solution. Other than that, you need do nothing. The water will evaporate when the machine runs again.

Hope this helps Let me know how it goes or if you need more help thanks Techdesk, Field Service Engineer Category UK Appliance Satisfied Customers 16,409 Experience Whitegoods engineer working for a multibranded national company in the UK. Verified Techdesk and 87 other UK Appliance Specialists are ready to help you Ask your own question now Customer reply replied 9 years ago Hi Thank you very much for you answer. I have had my machine back on and on supercool for a couple of hours now but it doesnt seem to be getting cooler very quickly. Do I need to defrost it again. I defrosted it last time for about 24 hours. Thank you UK Appliance Technician Techdesk, Field Service Engineer replied 9 years ago Hiya, Defrost for a fridge freezer is around 24 hours with the doors open. Putting supercool on will do nothing. The compressor will run to cool the machine and pressing supercool cant turn the compressor on as its already on. If its not cooling adequately, is the compressor running all the time. Is the compressor very hot. Thanks Ask Your Own UK Appliance Question Customer reply replied 9 years ago Hi there, No the compressor is very cool. The fridge and freezer are warm now. Thanks UK Appliance Technician Techdesk, Field Service Engineer replied 9 years ago Hiya, Is the compressor running. Thanks Ask Your Own UK Appliance Question Customer reply replied 9 years ago Hi, I dont think it is any more. Its not making any noise. Thanks UK Appliance Technician Techdesk, Field Service Engineer replied 9 years ago Hiya, OK, thanks for that. Can you post the actual model number of the appliance please. Ill see if I can find any technical documents for your appliance. Thanks Ask Your Own UK Appliance Question Customer reply replied 9 years ago Hi there I dont have the model number, I am afraid, as the fridge came with the house when we bought it. The compressor has model number on it NBT111CY.

Thank you UK Appliance Technician Techdesk, Field Service Engineer replied 9 years ago Hiya, The model should be on a label inside the fridge. Behind the salad drawers are a favourite hiding place. Thanks Ask Your Own UK Appliance Question Customer reply replied 9 years ago Hi, Yes its there. COA380AU Thank you Sorry I accidently pressed accept. UK Appliance Technician Techdesk, Field Service Engineer replied 9 years ago Hiya, No problem. Ill still continue working with you. How long since you turned the machine back on. Its controlled by sensors and a pcb so it will go into defrost mode before it turns on the compressor. Thanks Ask Your Own UK Appliance Question Customer reply replied 9 years ago Hi, Thank you very much, Its been about 5 hrs now since I turned it back on. THanks UK Appliance Technician Techdesk, Field Service Engineer replied 9 years ago Hiya,

OK, if the compressor is still not running it would suggest you have a problem with the main control board in the appliance now. This is in addition to the cooling problem you were experiencing. Unplug the appliance again. Wait 1 hour. Plug the machine in, set the temperature selector to the midway position. Let me know what happens. Thanks Ask Your Own UK Appliance Question Customer reply replied 9 years ago Thank you, Ill give it a go now and get back to you. UK Appliance Technician Techdesk, Field Service Engineer replied 9 years ago Hiya, Good luck with it. Thanks Ask Your Own UK Appliance Question Customer reply replied 9 years ago Hello there, I have turned it back on as you suggested but the compressor is still very quiet. How long should it take before it starts working again if it ever does. UK Appliance Technician Techdesk, Field Service Engineer replied 9 years ago Hiya, I would expect it to start up within 20 minutes of turning on. If you get nothing at all from the compressor even a hum then a click then it would suggest a serious fault with the appliance.

It could be the main control board or the compressor at fault. Sorry, without it running, its not possible to try and diagnose the cooling fault. To check the electronic board, unplug the appliance and gain access to the board where the controls are. Check the board for any obvious damage. Let me know what you find. To check the compressor. Unplug the appliance. Take the cover where the mains cable enters the machine off. The live cable going in, take it off and temporarily join it to the black wire on the connection block. Plug the machine in and the compressor should run. double check the wiring and confirm the connections with me first. Thanks Ask Your Own UK Appliance Question Was this answer helpful. Techdesk is online now Get an Answer Continue Share this conversation See more Related UK Appliance Questions I have a 7 year old Hotpoint FZ150G Frostfree upright Hi, I have a 7 year old Hotpoint FZ150G Frostfree upright freezer stored in the garage. I have a fridge and freezer in one appliance and the fridgepart Hi. I have a fridge and freezer in one appliance and the fridgepart stopped working. On the backside of my fridge, above the compressor, theres a plastic container. Hi I am having problem with Brandt fridge freezer model cfa310wu. Suddenly the top compartments i.e the conventional fridge is freezing and the freezer has stopped freezing. I have been removing this as and when about once a week. The fridge gets too cold and will freeze BEKO fridge freezer. The fridge gets too cold and will freeze eggs. The freezer will not freeze ice cream. Water has started to collect and freeze in the bottom of the freezer department below the bottom drawer. I assume that there is a blockage stopping the condensate getting away. We have to remove ice every second day from the freezing compartment. Some months since last defrost, so probably not due to that. The appliance was bought in December 2008. My Samsung American Style fridge freezer is causing a problem.
